Inventi on

 Léone Batista Alberti (1404-1472)
 Architecte, peintre et philosophe
 « Della Pittura »

• Filippo Brunelleschi, architecte

Définition

•« Science qui enseigne comment représenter des objets tridimensionnels sur une surface bidimensionnelle, afin que l'image en perspective coïncide avec celle donnée par la vision directe de l'objet. »

L'image du monde

« La perspective donne un cadre, elle renforce donc l'existence de l'<u>image</u> »
Meyer Shapi ro
